Biography

Mansour Moti was born on September 19th, 1971 in Bojnourd, Iran. He is one of the few designers of 3D paper models in Iran whose interest in art can be traced back to his childhood. After familiarity with the 3D paper model at a young age, Mansour Moti moved towards self-taught skills in designing 3D paper models and replica making. With more than 20 years of professional 3D paper model design and graphic design experience, he has been a freelance artist, specialized in 3D paper model design in both instructional-entertainment and advertising areas, particularly books for all ages and industrial products' promotions. He is known for his ten published books of scale 3D paper models of cars, airplanes, commercial vehicles, etc. by Ofoq publishing. In addition, some domestic and international projects of 3D paper models are his recent achievements, included in this portfolio.

His areas of expertise include 3D paper model design, replica and model design and making, graphic design by softwares such as Adobe Photoshop, Adobe Indesign, 3D Studio Max, Corel Draw and Pepakura Designer.

Mansour Moti Portfolio

Concerning that natural history and automotive museums are one of my potential clients, I contacted some of them in Canada and US too. (our emails are enclosed in my sent documents).

Based on an agreement with Canadian Automotive Museum in Oshawa, as the first step toward our possible cooperation in the future, I proposed to make two of their cars' 3D paper models.

Z-ART

Mansour Moti Portfolio

The Z-Art project was a collaborative project of designing 3D paper models with Shafiullah Zar in Pakistan according to his client's order in the United States. In this project, I designed 4 models of famous cars as an accomplished contract and, in continue, several models will be done that two of them are completed and, the photos are included.

DUESENBERG

Z-ART / Winter 2021

I have been keen on designing an old classic car's 3D paper model for a long time and, fortunately, I achieved this goal through this project (Z-ART contract). This model consists of about 70 pieces, printed on five A4 sheets. I love this model.

Ofoq Pub

Mansour Moti Portfolio

My collaboration with Ofoq publishing, one of the most well-known in Iran, started with two 3D paper model collections, titled "Kardastie Man" (My Handworks). Every collection consists of 5 books on various topics. The first collection is available in Vancouver_Canada in the Pan-Beh bookstore now. you can find them on the website:(www.Pan-Beh.com).

The second collection of (Kardastye Man) books, namely (Road Construction Vehicles) have been published and on the market(second edition).

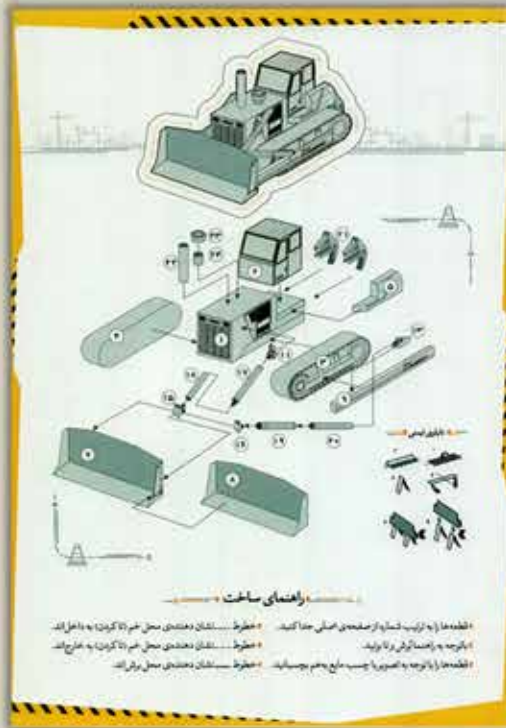

After the selection of the original sample and the determination of design level, it`s time to draw brief sketches as the base of different parts` designing.

Tyrannosaurus

Tyrannosaurus is the symbol of the Jurassic and Dinosaurs eras so it seemed to be necessary for me to involve its 3D model in the present collection, however, designing and assembling its pieces was definitely hard in terms of keeping the model balanced on two feet.
